

GAMUDA GROUP PROCUREMENT POLICY

Gamuda Berhad (“Gamuda”) recognises the importance of good governance in our procurement practices. We embark on a digital platform for our procurement system where we drive transparency, efficiency, fair and equal competition with safety, quality and sustainability in mind to enable us to deliver high quality Projects.

Our Aim

- To promote Sustainable Procurement by considering safety, economics, social and environmental aspects.
- To promote diverse range of supply chain to enhance the capabilities of small-medium enterprises (SMEs) including sourcing of raw materials locally and fostering healthy business environment. Supplier diversities will enhance sustainability, flexibility, innovation and create value.

Our Approach

- We evaluate our supply chain performance on a regular basis for compliance with safety, quality, environmental requirements in line with sustainability goals.
- We adopt E-procurement to drive transparency, fair and equal competition
- We provide opportunities and support indigenous, local businesses including social enterprises.
- We prioritise suppliers who have embedded sustainable practices within their own supply chain.
- We identify and mitigate risks associated with our procurement process
- We communicate this policy to highlight awareness among our stakeholders in the supply chain.
