

# REGIONAL GROWTH WITH EXCELLENCE

## WHO WE ARE

A globally recognised engineering, property and infrastructure conglomerate renowned for innovative solutions and steadfast commitment to sustainable development.

#### **OUR STORY**

Our journey, which spans nearly five decades, is marked by innovation, resilience, and a commitment to responsible business practices. We consistently deliver sustainable profits while prioritising environmental stewardship and social responsibility.

Our success is built on a foundation of core values that balance economic growth with positive contributions to society and the planet.

## **OUR EXPERTISE**

Multifaceted expertise in the built environment showcasing diverse capabilities and commitment to delivering exceptional value.

# UNLOCKING OPPORTUNITIES WITH DT INFRASTRUCTURE

DT Infrastructure became part of the Gamuda Group following the acquisition of Downer's infrastructure projects division in 2023.

This strategic move strengthens the Group's competitiveness and accelerates our regional expansion plans.

Integrating DT Infrastructure into the Group offers a unique synergy of global knowledge with local expertise in complex projects, embodying engineering innovation, collaborative contracts, and sustainable practices.

DT Infrastructure complements the existing expertise of Gamuda Engineering (GEA) in Australia.

DT Infrastructure's core expertise:

- Rail infrastructure and maintenance
- Roads and bridges
- Defence
- Power and renewables
- Water

# PROJECT LOCATIONS

1	Adelaide Heavy Rail O&M – Infrastructure	19	Man

GAMUDA

#### SUSTAINABLE PLANNING AND DESIGN FOR CONSTRUCTION

The Gamuda Green Plan 2025 is our strategic environmental, social and governance (ESG) living blueprint for the Group. This comprehensive framework was developed in 2021 to address ESG risks and opportunities while delivering positive benefits and value to the economy, environment, and communities.

**PILLAR** 

#### **OUR COMMUNITY IN OUR BUSINESS**

To equip ourselves with the right ESG knowledge, become subject matter experts in our respective domains and cultivate good governance in ESG.

PILLAR

PILLAR

#### **ENVIRONMENTAL AND BIODIVERSITY** CONSERVATION

To drive impactful efforts in nature conservation and biodiversity stewardship in our developments.

#### **ENHANCING SUSTAINABILITY VIA DIGITALISATION**

By leveraging on technology and data management that will enhance and enable Group-wide efforts in sustainable developments.

#### **OUR NET ZERO JOURNEY**

Before 2021

Our Stormwater Management and Road Tunnel (SMART) project, constructed in 2002 was our first climate-related infrastructure project. The primary purpose of SMART is to address two critical issues: flood prevention and traffic congestion in Kuala Lumpur

In 2016, we launched Gamuda Next-Gen Digital IBS, which involved the use of digital design tools and robotics for safer and more sustainable construction, resulting in minimal wastage

In **2017**, climate action became one of our material matters

\_\_\_\_\_

In 2018, we established
Gamuda Parks to ensure biodiversity
and communal spaces were integrated in our developments.
This was also the foundation for our carbon sequestration efforts

In **2020**, we began disclosing our carbon emissions data via CDP

----

2021

Launch of the Gamuda Green Plan 2025, which aims for a 30 percent reduction in Scope 1 and Scope 2 emissions intensity by 2025, and 45 percent by 2030

- Implemented carbon traceability using cloud-based ESG software
- Aligned our sustainability reporting with TCFD
- Obtained external assurance on Scope 2 emissions
- Began monitoring our Scope 3 construction emissions

-----

2022

# Committed to being a net zero carbon organisation by 2050

- Adopted the Gamuda Group ESG Policy that includes our carbon reduction plans
- Became an official supporter of TCFD
- Committed to SBTi and became an official member of the Business Ambition for 1.5 degree celsius campaign
- Implemented an integrated cloud-based software to enhance our emissions data monitoring and reporting
- External assurance on Scope and Scope 2 emissions
- Began Scope 3 emissions traceability disclosures
- Promoted supply chain readiness towards an integrated carbon reduction programme
- Acquired 30 percent equity stake in ERS Energy Sdn Bhd

2023

# Received ISO14064-1 verifications for our disclosed GHG emissions data

- Report Group's emission to MGTC via Low Carbon Operating System, LCOS
- Began collecting our Scope 3 emission data from suppliers and disclosing data from eight out of the 15 emission categories according to the GHG Protocol
- Increase usage of renewable energy to 21 percent of Group total energy
- Continued validating our current state based on LCC 2030 challenge, ensuring alignment to reduction capabilities (Diamond rating)
- Introduced EV infrastructure at our offices and premises
- Building through Wetlands Arboretum Centre
- Continued to expand the conversation on renewable energy usage such as GET/RECs

-----

2024

# All project sites managed by Gamuda Engineering Australia are powered by 100% renewable energy

- Ranked second for the Overall ESG category in the 2024 Asia Pacific (ex-Japan) Executive team by Institutional Investor Research (II Research)
- Honoured with a Gold award in the Renewable Energy category at the ESG 2024 Positive Impact Awards, organised by The Star
- Inaugural assurance for scope 3 emissions data
- Delivering works for Aula Energy for onshore wind farm in Central Queensland
- Deployment of the Mobile Solar Farm systems at the Australia's project construction area
- Gamuda Cove is home to six Tesla Superchargers and 18 Destination Chargers, making it the largest Supercharging station in Southeast Asia
- Certified The Edge Advance Wetlands Arboretum Centre (WAC) now open to academics, researchers and public
- Teaming with Rohas Tecnic Berhad (Rohas) to bid and deliver Australian transmission projects

2025

 SBTi has approved Gamuda's near- and long-term sciencebased emission reduction targets, as well as verified the net-zero target

# **ENGINEERING A DIGITAL LEGACY**

From the outset, we've embraced digitalisation across all project aspects, exemplified by our early adoption during the Stormwater Management and Road Tunnel (SMART) project, a pioneering climate mitigation initiative.

Our commitment to innovation is ingrained in our vision: "Leading the region in breakthrough solutions."

#### Four Pillars of Digital

#### **Digital Engineering Governance**

Unifying and improving our technology landscape

#### Digital Community

A community of like-minded staff to support and collaborate

#### Data Excellence

Improving collection, management and innovation of data across the Group

#### Digital Empowerment

Empowering our employees to build solutions through our Data Hero programme

We remain at the forefront of infrastructure and development designs using the latest technology and tools managed in-house.

Enabling our digitalisation ambitions is the Gamuda Excellence Transformation (GET) programme, which The common goal towards implementing advanced elevates digital excellence through technology deployment across the group.

At its core is the Gamuda Digital Operating System (GDOS), a unified ecosystem that consolidates enterprise data on a single cloud platform, laying the foundation for 4D and 5D Building Information Modelling (BIM) systems, Next-Gen Digital Industrialised Building System (IBS), and Generative Artificial Intelligence (GenAI).

Our Gamuda Green Plan 2025 aims to accelerate our organisation by digitally integrating our processes. Using digital design tools and robotic construction will support our ability to measure our impacts.

digital tools, methodologies and solutions, the Group has achieved greater efficiency, precision and accuracy, cost savings, and improved project outcomes.

#### BIG DATA ENABLING GLOBAL VISIBILITY OF PROJECTS

We've embraced a data-first approach to engineering, positioning ourselves as a technology-driven, datacentric organisation. This approach has revolutionised our operations, fostered innovation and established new industry benchmarks. By centralising our project data through intricate and robust data warehouses, we've created a unified ecosystem that ensures easier As a result, we've seen a transformative impact on our access to critical information and facilitates improved decision-making across all levels of our organisation.

This approach has not only improved our operational efficiency but has also positioned us to leverage advanced technologies like AI and machine learning, optimising processes, budgets, safety, and quality control across all our projects.

regional workforce, with data visualisation and analytics skills becoming essential even for field personnel, fostering a more collaborative and innovative work

#### **Innovative and Novel Approach** to Talent and Skills Building

Our pioneering Gamuda Al Academy offers a comprehensive three-month curriculum focusing on full-stack AI development, including front-end, backend, and AI technologies. The academy leverages Google Cloud's capabilities to develop and deploy scalable solutions and address the shortage of technology-related talents in the construction sector.

Internally, we provide a platform for talent to share and showcase ideas and breakthroughs under our monthly masterclass programme. Our Data Hero programme has also opened avenues for Gamudians to pursue fully-sponsored cloud certification. This has led to a strong community of learners and innovators.

#### **Integrated Dashboard Offers Full Project Visibility**

We have implemented a unified platform that centralises project data, facilitating the creation of insightful dashboards. These dashboards, powered by tools like Power BI and BigQuery, provide realtime updates on project status, operations, and various processes throughout our projects. This approach has transformed our data into a potent strategic tool, enabling management to make informed decisions and optimise project outcomes, surpassing IR4.0 industry standards.

#### **Extended Realities and GIS Brings Reality Context to Construction Projects**

As innovators in construction, Gamuda has developed the Building Information Modelling Augmented Reality (BIMAR) app to allow digital BIM designs to be overlaid onto physical construction sites for improved inspection, validation, and clash detection. These technologies significantly improve on-site decision-making and problem-solving. We have also commissioned the use of virtual reality headsets to simulate safety training.

Geospatial Information System (GIS) in Gamuda is used for advanced mapping, spatial analysis, and project planning. The integration of GIS with our other technological innovations enhances our ability to manage and visualise complex spatial data, further solidifying Gamuda's position as a leader in digital transformation within the construction industry.

18

#### **AUTODESK CONSTRUCTION CLOUD**

# A unified platform to drive construction innovation across APAC

**AUTODESK** 

The dynamic collaboration between Gamuda and Autodesk, which began in 2022, has propelled the widespread integration of Autodesk Construction Cloud (ACC).

Gamuda utilises ACC as a key part of Gamuda Digital Gamuda's digital efforts also have been highlighted in Operating System (GDOS), which drives the several publications and insights by Autodesk. collaboration and data collection from projects.

Integrating ACC throughout our engineering processes has broken down the barriers of people operating in silos

ACC unites teams across design, health and safety, contracts, commercial and project delivery onto a single technology platform. The unified platform allows seamless collaboration between multidisciplinary and regional teams, faster project completion time, keeping within budget, and meeting global standards.

Gamuda has established a strong strategic and collaborative relationship with Autodesk, exemplified by regular invitations for us to speak in high-level international events such as TechX, Autodesk University, and the Construction Executive Council (CXC). Gamuda's digital efforts also have been highlighted in several publications and insights by Autodesk.

#### The impact at a glance

- Built a more robust common data environment where everybody can collaborate most effectively
- United multidisciplinary teams across borders to improve integrated project delivery
- Deployed and scaled digital processes across regional teams with ease
- Digitised and centralised cost management capabilities, reducing the need for manual entry
- Empowered businesses to innovate with a robust digital environment to build upon

# A robust digital backbone for technology in construction

Artificial Intelligence (AI) is rapidly evolving and reshaping industries. In the construction sector, traditionally slow to embrace technological change, AI is now poised to catalyse a profound transformation and Gamuda is a step ahead.

In recent years we have strengthened our partnership with Google Cloud to integrate enterprise-grade Generative Artificial Intelligence (GenAI) capabilities and its cloud computing expertise into our operations. GenAI tools empower our workforce to develop innovative, custom AI solutions integrated with our existing workflows.

Developed in-house, Bot Unify is an AI-powered marketplace of virtual assistants accessible to all Gamuda employees. Bot Unify has been successfully employed across various departments, including tender teams, building units, ESG, and HR, streamlining operations and enhancing decision-making.

This partnership has transformed our infrastructure projects, generating significant stakeholder interest across Malaysia, Australia, Taiwan, Vietnam, Singapore, and the broader industry.

#### **NEXT-GEN DIGITAL IBS**

Next-Gen Digital IBS is the future of residential, commercial and infrastructure construction. From cloud design, BIM integration and automated production – this digital solution delivers design flexibility, fast construction and superior quality finish

Our factories are located in Banting and Sepang, Selangor. With Malaysia's largest manufacturing capacity, Gamuda is ramping up production to support its data centre project wins.

Gamuda aims to transform the industry with Next-Gen Digital IBS as a driving force behind the Gamuda Green Plan, enhancing resource efficiency and sustainability.

A Life Cycle Analysis on Gamuda Gardens Valeria Phase 5A revealed that it significantly reduced product and construction stage and upfront embodied emissions compared to conventional construction, as well as achieved significant waste reduction, and electricity, fuel and water savings.

# Our portfolio Data Centre Commercial High Residential Residential

40% faster delivery

All products have QR codes that can be tracked throughout the entire supply chain  Autonomous product production using data and learnings through factory IoT network and previous iterations  Clash analysis in a cloud-based 3D building information model (BIM) allows for precise pre-planning  Productivity can be monitored remotely  BIM augmented reality mobile application called BIMAR allows  Like Lego bricks, home parts will be delivered in pods or boxes to	Al IoT robotic manufacturing system improved the materials used in making concrete panels	40% reduction in embodied carbon	55% reduction on foreign worker reliance

more accurate inspection the construction site and assembled from there		application called BIMAR allows	be delivered in pods or boxes to the construction site and

# Cloud-based system and design integration

A key differentiator in our township development is the accelerated adoption of 100 percent Digital IBS for both landed and high-rise projects in Gamuda Land, ensuring quality, speed, and minimal waste

This IBS design gives us a competitive edge in bids from property developers and infrastructure builders, addressing market challenges with a focus on green building, innovation, and technology.

Gamuda's Next-Gen Digital IBS offers comprehensive digital services, including land-based digital design and value engineering, with various precast products for residential, commercial, and infrastructure projects.

The Construction Research Institute of Malaysia has independently verified Gamuda's Next-Gen Digital IBS to increase builder productivity, equip contractors for the Industry 4.0 revolution and create higher-income job opportunities in Malaysia.

Our high-quality control standard is already seeing the Next-Gen Digital IBS rapidly expanding into several Gamuda Land projects, including Amber Residence at twentyfive7, GAIA Residences at Gamuda Gardens and Maya Bay Residences at Gamuda Cove and our newly launched Park Homes within all three townships.

22

# RENEWABLE ENERGY

In alignment with the Group's Environmental, Social and Governance (ESG) approach, we have ventured into new green vertical business, focusing on renewable energy and the circular economy across the region.

Our expanding energy capabilities cover solar farms, hydroelectric dam, wind power plants, pumped hydro energy storage and transmission network upgrades and expansion.

In 2022, the Group signed the Subscription and Shareholders' Agreement (SSA) with ERS Energy Sdn Bhd (ERS Energy) and its shareholders for the subscription of new shares in ERS Energy to a 30 percent equity interest.

This strategic investment and partnership with ERS Energy accelerate Gamuda's renewable energy plans. In Malaysia, our diversification into the renewable energy business began with the NEDA39 Solar Farm jointly delivered by ERS Energy, followed by the Ulu Padas Hydroelectric Project.

As we take the next step in our Australian growth plans, we aim to become a leading end-to-end energy infrastructure partner - investing, developing, building and owning assets to accelerate Australia's clean energy future.

We have partnered with **Rohas Tecnic Berhad (Rohas)** to target the country's energy transmission market, connecting renewable energy zones to the national grid. Prior to this, we also introduced **Australia's first mobile solar farm for the Western Tunnelling Package (WTP) project's onsite office.** 

For DT Infrastructure, its established portfolio of renewable energy projects was a crucial factor in its acquisition, further enhancing the Group's expertise in rail construction.

Offering a comprehensive range of services from planning and construction to operations, maintenance, and decommissioning, DT Infrastructure delivers sustainable infrastructure projects under all contracting models.

# BOULDER CREEK WIND FARM, AUSTRALIA

DT Infrastructure has been awarded by Aula Energy and CS Energy to deliver the Boulder Creek Wind Farm in Queensland, Australia.

This is the first wind farm project to be delivered by Gamuda Group under the DT Infrastructure brand and expected to increase the region's renewable energy supply.

The project works include 38 turbines, with a generating capacity of 228 MW (6 MW per turbine) to power approximately 85,000\* homes, and civil and electrical works to construct 41km of access tracks with grades up to 15 percent and 70,000 m3 of cut/fill bulk earthworks.

Once completed, the Boulder Creek Wind Farm will significantly contribute to Queensland's goal of achieving 50 percent renewable energy generation by 2030. Project works commenced in late 2024.

\*Estimated equivalent number of homes powered based on country-specific electricity household consumption data (Enerdata, 2020)

Project value – RM702 million (AUD243 million)

**Design and Construct** 

Installation of 38 turbines and construction and electrical works of 41km of access tracks

# GOULBURN RIVER SOLAR FARM, AUSTRALIA

DT Infrastructure has secured the Goulburn River Solar Farm project in the Upper Hunter region of New South Wales (NSW), Australia, from Lightsource bp Renewable Energy Investments Limited (Lightsource bp).

The project works include civil, structural and electrical infrastructure required for the 585 MWp solar farm.

Once operational, the solar farm will generate enough renewable energy to power approximately 225,000 homes.

The project is also expected to cut carbon emissions by 910,000 tonnes annually, contributing significantly to Australia's sustainability goals and green energy transition.

Beyond delivering cleaner energy, the project will enhance economic opportunities for the region and fortify NSW's electricity grid, underscoring its role in supporting the state's energy transition.

Project value – RM1.8 billion (AUD625 million)

Engineering, procurement and construction

Civil, structural and electrical infrastructure required for the 585 MWp solar farm

# **TUNNELLING**

The world's first dual-purpose stormwater diversion and motorway tunnel

Project value – RM 1.9 billion (AUD610 million)

Public-Private Partnership

**Turnkey Contractor** 

Concessionaire

- CNN's list of top ten tunnels in the world
- United Nations-Habitat Scroll of Honour Award 2011
- Special award for National Contribution, FIABCI Malaysia Property award, Malaysia Chapter 2010
- Best international project,
   British Construction Industry award 2008
- Special award for large project, British ACE Engineering Excellence Awards 2008

# STORMWATER MANAGEMENT AND ROAD TUNNEL (SMART), MALAYSIA

SMART left an indelible legacy on the Malaysian infrastructure engineering landscape when it took the world by storm with its unique concept to solve two of the most critical dilemmas faced by urban cities- traffic and floodwater drainage.

Functioning as a climate mitigation infrastructure since 2007, this world's first dual-purpose 13.2m diameter tunnel was constructed with a slurry mix-shield tunnel boring machine (TBM) – the latest in Southeast Asia and the second largest in Asia. The stormwater tunnel length runs 9.7km, while the double decking motorway length is 3km.

SMART tunnel in its own capacity could address 45 percent of Klang Valley's major floods, especially within flood-prone areas such as Masjid Jamek, Dataran Merdeka, Leboh Ampang and Jalan Melaka.

#### Mode 1

No flood water will be diverted into the SMART system.

#### Mode 2:

The SMART system will be activated, and flood water will be diverted into a bypass tunnel in the lower channel of the motorway. Up to this point, the motorway will still be open to traffic.

#### Mode 3:

The SMART system will be activated and the motorway will be cleared and closed to traffic. Sufficient time will be allocated to allow the last vehicle to exit the motorway. The tunnel is on standby mode for stormwater diversion into the motorway component.

#### Mode 4:

The SMART system will be activated if a heavy rainstorm prolongs, and the motorway will be filled with stormwater after all the gates are opened. Motorway components will be used for the passage of floods after traffic evacuation is completed. The motorway will be re-opened to traffic within 48 hours.

#### Climate mitigation innovation

SMART is touted as a visionary infrastructure built with a sustainable, climate change solution in mind. It is innovative and unique, and the design incorporates green infrastructure.

The tunnel has demonstrated the degree of urban development Malaysia has achieved and is an example for other developing countries to emulate. SMART continues to evolve and improve its ESG value.

The operations of the SMART Tunnel are classified into four different modes.

#### UNDERGROUND TUNNELLING WORKS

Challenging geotechnical engineering

The biggest challenge in our underground construction works are the geological formations beneath Kuala Lumpur. The tunnelling works primarily face three key geological formations: Kenny Hill, Karstic Limestone and Granite, with most of the tunnel alignment situated in Grade V karstic limestone.

The underground portion of the MRT Putrajaya Line traverses very complex ground environment. There are many mixed-face conditions, as well as interfaces of different geological conditions and faults. There are guite a lot of guartz intrusions, which makes it a lot more challenging.

The land condition for the MRT Kajang Line also proved to be challenging as the tunnel had to cross the two main landforms of sand and sedimentary rock formation at Kenny Hills and limestone formations in Kuala Lumpur. To tackle these complex conditions, we saw the debut of the Variable Density (VD) TBM, the first of its kind in the world.

#### **Variable Density Tunnel Boring** Machine (VD TBM)

various tunnelling modes with a unique feature – the a significant upgrade from our groundbreaking ability to adjust slurry density for different ground VD TBM. Developed in-house, the autonomous TBM conditions. Developed in response to challenges faced during the SMART project, the VD TBM achieved a autonomous control of TBM operations. Real-time remarkable 95 percent reduction in sinkhole incidents analysis of machine data enables the system to take during the construction of the MRT Kajang Line, charge of steering, advancing, excavating and slurry highlighting its effectiveness in ground control.

As the industry's first of its kind, the VD TBM continued to be optimised for the MRT Putrajaya Line, pushing the boundaries of underground construction and laying the foundation for Gamuda's autonomous tunnel boring machine (TBM).

- Innovation award (Variable Density in Tunnelling Technique) for MRT Kajang Line (underground), Malaysian Construction Industry Excellence Awards (MCIEA) 2017
- Technical innovation of the year, MRT Kajang Line (underground), MCI international tunnelling and underground space awards 2014

#### **Autonomous Tunnel Boring** Machine (TBM)

Gamuda's VD TBM is a versatile solution designed for Introducing the world's first autonomous TBM utilises custom artificial intelligence algorithms for sub-systems with minimal human input.

> The result is safer tunnelling, enhanced cost efficiency, faster response times, higher accuracy, and tangible productivity. The autonomous TBM's capability to effectively integrate multiple TBM drives has been successfully demonstrated in MRT Putrajaya Line tunnel drives, covering four distinct geological formations.

- Innovation in Tunnel Excavation Award, New Civil Engineer Tunnelling Awards 2019
- Technical product/equipment innovation, ITA Tunnelling and Underground Space Awards

# RAIL AND METRO SYSTEMS

## MRT KAJANG LINE, MALAYSIA

The Nation's most iconic infrastructure

Malaysia's first metro system - the Mass Rapid Transit (MRT) Kajang Line, was handled from conceptualisation to completion by our joint venture MMC Gamuda.

Pioneering the first Project Delivery Partner (PDP) model in Malaysia by taking on a single point of accountability, Gamuda guaranteed the delivery of the elevated section to safety, quality, time and cost. Featuring world-class metro facilities complete with sustainable, energy-efficient features, the MRT Kajang Line aims to serve a catchment of 1.2 million people, connecting passengers travelling between populated residential, commercial centres and key employment hubs in the Klang Valley.

The line has 29 stations, of which seven are underground, and the world's first VD TBM was deployed for the underground portion of the alignment. The MRT Kajang Line is a symbol of greater and more seamless urban connectivity in Malaysia.

Project value - RM25.6 billion (AUD8.2 billion)

**Project Delivery Partner (PDP)** 

42km | 29 stations

Serving a catchment of 1.2 million people

Used highly-complex VD TBMs for challenging karstic limestone ground

# MRT PUTRAJAYA LINE, MALAYSIA

A success of innovation excellence

The success of MRT Kajang Line led to Gamuda delivering the MRT Putrajaya Line, solidifying the Group's reputation as the premier rail and infrastructure partner in Malaysia. As the turnkey contractor for the entire MRT Putrajaya Line alignment, Gamuda constructed the elevated and underground portions.

With 36 operational stations, of which 27 are elevated and nine underground, the second line of the KVMRT Project serves a corridor population of approximately 2 million people, stretching from Kwasa Damansara to Putrajaya, Malaysia's federal administrative centre.

This game-changing project significantly impacts the places it crosses, bringing the nation's government agencies and suburbs around Klang Valley closer to the city centre.

Project value - RM30.7 billion (AUD9.8 billion)

# RAIL AND METRO SYSTEMS

# ELECTRIFIED DOUBLE TRACK PROJECT (EDTP), MALAYSIA

Ipoh - Padang Besar

Working together with the Ministry of Transport, we fulfilled the Malaysian Government's objective to reduce the heavy dependence on road transport through a railway that provides more efficient intercity travel.

The successful completion and operation of the EDTP has since provided a tremendous multiplier effect for the nation. The rail network positively impacted tourism in the northern region by increasing accessibility to major cities, commercial hubs for locals and foreigners, and a faster and more efficient cargo transportation mode to the Indo-China region.

Consisting of two tunnels, seven main stations and spanning 329km, the project involved laying two parallel electrified tracks linking the states of Perak, Kedah, Penang, and Perlis. The double-track was designed to cater for electric trains that move at speeds between 140-160kph, drastically cutting down on the average travelling time by two-thirds.

Aside from upgrading the original single track to two parallel rail tracks, the EDTP project scope included constructing new stations, various bridges, tunnels, land and marine viaducts, control centres, and a depot. We also completed the electrification of the tracks and signalling systems. Since it began transporting passengers back in 2008, the line has handled more than 20 million passengers each year.

Project value — RM12.2 billion (AUD3.9 billion) Turnkey Contractor 329km, 15 stations

# RAIL AND METRO SYSTEMS

# PENANG MUTIARA LINE, MALAYSIA

Gamuda secured the contract for the first civil works package of the Penang Mutiara Line (MTL) in early 2025.

Through a single-sourcing request for proposal, MRT Mutiara Sdn Bhd, a subsidiary of MRT Corporation Sdn Bhd, awarded the project to SRS Consortium, which is a 60:20:20 joint venture between Gamuda Berhad, Loh Phoy Yen Holdings Sdn Bhd and Ideal Property Development Sdn Bhd.

As the main civil contractor, SRS Consortium will construct the first segment covering Komtar to Silicon Island, which is part of the 23.7km MTL. Its base alignment runs from Penang South Reclamation Island A (PSR-A) with Penang Sentral and Georgetown's Komtar Station.

Construction works are to begin in early 2025 and scheduled for completion within six years from the Notice to Proceed.

Once operational, the Mutiara Line will enhance mobility and connectivity, reduce traffic congestion, and boost Penang's economy and tourism while supporting Penang's comprehensive transportation masterplan and aligning with the Silicon Island initiative to establish Penang as a top destination for high-tech investors.

Project value – RM8.32 billion (AUD3.0 billion)

Design and Build

23.7km elevated viaduct, 19 stations, one provisional station, one depot, ancillary structures, at-grade park and ride (AGPR), utilities and services relocations, utility buildings, external surface works, and other associated works

# KAOHSIUNG MASS RAPID TRANSIT (MRT) METROPOLITAN ORANGE LINE – PACKAGE CO4, TAIWAN

Before Gamuda embarked on building the SMART Tunnel, we clinched a tunnelling job in Kaohsiung, Taiwan. Working with the Kaohsiung Rapid Transit Corporation, Gamuda built 3.86km of the 43km line, which involved constructing two parallel underground tunnels and two underground stations – the two-storey Fengshan Junior High School and four-level Dadung

Our engineering expertise was deployed in complicated situations where ground conditions were soft, wet and aggravated by earthquakes.

After completion, our rigorous approach to environmental protection, quality control and project management earned us the Air Quality Protection Award and National Environmental Protection Outstanding Award from the Government of Taiwan in 2003.

Project value – RM800 million (AUD263.5 million)

Design and Build

Package C04

# SYDNEY METRO WEST – WESTERN TUNNELLING PACKAGE, AUSTRALIA

Our ambition of becoming a regional tunnelling contractor propelled us to leverage our domestic tunnelling expertise to bid for competitive overseas tunnelling jobs. In early 2022, we successfully clinched our maiden rail tunnelling contract in Australia through the awarding of the Western Tunnelling Package (WTP), Sydney Metro West (SMW) project.

The WTP is expected to create multiplier social benefit initiatives and is Gamuda's largest overseas tunnelling contract secured to date.

Early works for this project commenced in April 2022. Autonomous tunnel boring machines Betty and Dorothy broke through in Sydney Olympic Park in June and July 2024, and tunnelling is expected to be completed in 2025.

A huge recognition of our tunnelling credentials, we are excited to share our international experience in building high-frequency rail sustainably, and are focused on generating benefit for communities in Western Sydney. We aim to deliver this infrastructure successfully and at the same time leave a positive legacy by creating local jobs and building a solid partnership with local stakeholders and communities.

Supporting a growing city and delivering world-class metro services to more communities, this new underground railway will connect Greater Parramatta and the Sydney Central Business District. SMW will create more than 10,000 direct new jobs and 70,000 indirect jobs, with many of these jobs generated by this major contract.

Project value – RM6.5 billion (AUD2.1 billion)

**Design and Construct** 

Twin 9km tunnels from Sydney Olympic Park to Westmead

Gamuda launched TBM Betty and TBM Dorothy, Australia's first autonomous tunnel boring machines (TBMs). For the first time in Sydney Metro history, TBMs Betty and Dorothy will use non-potable water to excavate and cool themselves.

# **DEFU STATION AND TUNNELS –** MRT CROSS ISLAND LINE (PHASE 1), SINGAPORE

Being awarded the deal to build Defu Station and Tunnels by the Singapore Land Transport Authority is another positive breakthrough for us and a testament to Gamuda's strategic business advancement in our target markets.

foray in Singapore, and an opportunity to contribute to its national agenda in major infrastructure investments benefitting both current and future generations. For the Singapore market, we continue to look forward to actively participating in its 15-year generational infrastructure upgrade plan, providing local employment opportunities, as well as expanding our international footprint in this close-to-home market given the healthy pipeline of exciting projects in the coming years.

Defu Station is one of the 12 stations on the MRT Cross Island Line (Phase 1), which serves residential and industrial areas such as Loyang, Tampines, Pasir Ris, Defu, Hougang, Serangoon North and Ang Mo Kio. Upon completion, the line will benefit more than 100,000 This also marked our second infrastructure project households along the vicinity. It is expected to improve access to industrial areas, leisure parks and new business hubs in the city. Defu Station commenced in the second quarter of 2022 and is scheduled for completion in 2030.

Project value - RM1.45 billion (AUD510 million)

**Design and Construct** 

One underground station and twin tunnels

# WEST COAST STATION AND TUNNELS -MRT CROSS ISLAND LINE (PHASE 2), SINGAPORE

Awarded by the Singapore Land Transport Authority (LTA), West Coast Station and Tunnels for MRT Cross Island Line (Phase 2) marks Gamuda's first independent venture in Singapore without joint venture partners.

This milestone underscores our proven capabilities and further solidifies the Group's position as a key player in the city-state's transportation infrastructure development.

A testament to our growing presence in Singapore, the West Coast Station and Tunnels package contract is Gamuda's second railway and third infrastructure project in the country awarded by the LTA.

The tunnelling package of Contract CR209 is part of the new Cross Island Line Phase 2 (CRL2), the eighth mass rapid transit (MRT) line, which comprises 15km with six underground stations. It will be constructed along West Coast Road.

The alignment for CRL2 will improve connectivity between the eastern, western and north-eastern parts of Singapore. Upon completion by 2032, CRL2 will benefit 40,000 households living on Sunset Way and along West Coast Road, which are currently not served by any MRT

Project value - RM1.8 billion (AUD540 million)

**Design and Construct** 

One underground station and twin tunnels, at approximately 1.9km

# TAOYUAN CITY UNDERGROUND RAILWAY PROJECT -PACKAGE CJ18 PINGZHEN COMMUTER STATION, TAIWAN

Our proven track record in designing and constructing rail and metro systems locally was instrumental to our appointment as the Main Contractor to deliver the ZhongFeng bridge protection works, the relocation of the TaoYuan City Underground Railway Project, Package LaoJie river bridge and the construction of a temporary CJ18 PingZhen Commuter Station in Taiwan by the above-ground and permanent underground PingZhen Ministry of Transportation and Communications' Railway commuter station. Bureau.

Upon completion, this 3.734km underground twinbound railway track and station at PingZhen will improve TaoYuan residents.

The project involves civil engineering and mechanical and electrical works for PingZhen Commuter Station, the

This is Gamuda's fifth project in Taiwan and will be executed by a 60:40 unincorporated joint venture between Gamuda and Asia World Engineering & mobility and reduce the traffic congestion faced by Construction Co. (AWEC), respectively. The project is estimated to be completed within 96 months.

Project value - RM2.13 billion (AUD680 million)

**Design and Construct** 

3.734km underground twin-bound railway track and one underground station

# KAOHSIUNG MASS RAPID TRANSIT (MRT) METROPOLITAN YELLOW LINE -PACKAGE YC01, TAIWAN

Our successful delivery of the award-winning Kaohsiung Mass Rapid Transit (MRT) Orange Line in Taiwan led to us clinching the Kaohsiung MRT Metropolitan Yellow Line Civil Engineering, Package YC01.

The project involves the construction of a 4.4km Estimated to be completed in 2032, this project is alignment located within NiaoSong District of which 3.5km comprises underground twin bored tunnels and 0.9km of elevated tracks, four stations (three underground and one above ground) and two crossovers and cross passages.

This project marks Gamuda's third railway project and sixth infrastructure project in Taiwan, reinforcing the Group's reputation as the leading partner for rail and infrastructure development in the region.

expected to serve 1.16 million people, significantly improving connectivity for over 40 percent of the city's total population and further enhancing services in six key districts - NiaoSong, SanMin, LingYa, XinXing, FengShan and QianZhen.

Project value: RM3.45 billion (AUD1.1 billion)

3.5km underground twin bored tunnels and 0.9km of elevated tracks, with four stations (three underground and one above ground)

**Design and Construct** 

# XIZHI DONGHU MASS RAPID TRANSIT, TAIWAN

The Group has secured a RM4.3 billion design and build The project involves the construction of 5.78km elevated contract from the Department of Rapid Transit Systems. our largest contract win in Taiwan to date.

set to follow upon instruction from the New Taipei City Government, bringing the total project value to RM15.1 billion.

This feat highlights our ability to consistently secure high-value projects in competitive international markets, reflecting our strong track record and the trust Taiwanese authorities place in our expertise and delivery.

viaducts and trackwork, six stations (above ground), New Taipei City Government, to deliver the Xizhi Donghu and system works such as rolling stock, power supply, Mass Rapid Transit (MRT) in Taiwan. This marks our signalling, platform screen door, communication system, seventh major infrastructure project in the country and is central monitoring system, auto fare collection system and depot maintenance equipment.

An additional works contract, valued at RM10.8 billion, is The project will be delivered by a 75:15:10 unincorporated joint venture between Gamuda and two Taiwan-based companies - MiTAC Information Technology Corp and Dong Pi Co Limited. The project is estimated to be completed within seven years.

> Upon completion, the MRT alignment will enhance Taiwan's urban transportation network, connecting Taipei's Neihu District and New Taipei City's Xizhi District.

Project value - RM4.3 billion (AUD1.5 billion)

# ROADS AND EXPRESSWAYS

Our extensive engineering reputation includes designing, testing, commissioning and constructing major road projects spanning hundreds of kilometres.

Through our intra-urban highways – Lebuhraya Damansara-Puchong (LDP), Shah Alam Expressway (SAE), Western Kuala Lumpur Traffic Dispersal Scheme (SPRINT Highway), we improved connectivity and accessibility for local communities across Klang Valley, and catalysed the developments and job creation, fostering long-term economic growth.

Project value - RM3.48 billion (AUD1.12 billion)

Design, Build, Finance, Operate

Infrastructure Concessions

Spanning 110km, serving over 2 million motorists daily

# SHAH ALAM EXPRESSWAY (SAE)

The Shah Alam Expressway (SAE), also known as KESAS is a 34.5km, dual three-lane road with 12 interchanges and three toll plazas. This road allowed several new townships to flourish, including Gamuda's very own Kota Kemuning, a 740-hectare township, our maiden attempt into property development and we have built many more since then.

The SAE links many areas in Greater Kuala Lumpur to Port Klang, Malaysia's largest port (the world's 12th best container port). Port Klang is located approximately 25km southwest of Kuala Lumpur City Centre, and the opening of SAE has enabled the easy movement of freight in and out of Malaysia.

# LEBUHRAYA DAMANSARA PUCHONG (LDP)

The Lebuhraya Damansara-Puchong (LDP) was Gamuda's second foray into highway construction. Connecting two key satellite towns in the Klang Valley, the LDP spans a 40km dual three-lane expressway with 19 interchanges, 21 bridges and four toll plazas. LDP also saw the construction of the first cable-stayed land bridge in Malaysia. The three-level overpass spans 600m over the Federal Highway and remains an important landmark until today.

# WESTERN KUALA LUMPUR TRAFFIC DISPERSAL SCHEME – SPRINT HIGHWAY

Connecting the Kerinchi Link, Damansara Link and Penchala Link wasn't an easy feat, but the SPRINT Highway did just that. The SPRINT Highway is a 26.5km dual three-lane road with 13 interchanges, 10 pedestrian bridges, three toll plazas and 700m twin-bore tunnels.

48

# **ROADS AND EXPRESSWAYS**

# COFFS HARBOUR BYPASS, AUSTRALIA

The Coffs Harbour Bypass is Gamuda's second big infrastructure win in New South Wales (NSW), Australia. Gamuda Australia, in a 50:50 joint venture with Ferrovial Construction (FGJV), was appointed by the NSW Government in mid-2022 to deliver the final piece of the Pacific Highway upgrade project.

The project will reduce travel times along the Pacific Highway. It will also boost the regional economy in the coastal city and improve connectivity, road transport efficiency and safety for local and interstate motorists.

We are geared to contribute to the largest infrastructure project in Coffs Harbour's history that will reshape the city's infrastructure connectivity by combining engineering smarts and environmental and sustainability innovation to ensure a positive legacy far beyond construction. The Bypass is expected to be open to traffic by late 2026.

Project value - RM4.1 billion (AUD1.4 billion)

**Design and Construct** 

14km new, upgraded four-lane highway

# M1 MOTORWAY EXTENSION TO RAYMOND TERRACE: BLACK HILL TO TOMAGO WORKS, AUSTRALIA

Gamuda Australia, in a 60:40 joint venture with John Holland, was awarded the contract to deliver the Black Hill to Tomago Package of Works for the M1 Motorway Extension to Raymond Terrace by the NSW Government.

The project is one of the largest infrastructure projects in the Hunter region's history. It's a game changer for local, regional and long-distance transport, unlocking congested Hunter roads and helping complete a traffic-light-free highway between Sydney and Brisbane. The project began in mid-2023 and is expected to be open to traffic in mid-2028.

Project value - RM3 billion (AUD1 billion)

**Design and Construct** 

10km of greenfield dual carriage highway

# **DUKHAN HIGHWAY, QATAR**

The 42.5km long highway connects Shahaniya town to the existing Zekreet interchange near the Dukhan Industrial area. This construction project included grade separated interchanges, bridges and ancillary works for the four-lane dual carriageway.

Project value – RM787 million (AUD252 million)

Build

42.5km highway, five grade separated interchanges and seven camel underpasses

# DURGAPUR EXPRESSWAY AND PANAGARH-PALSIT HIGHWAY, INDIA

We entered the international civil infrastructure market with the colossal Panagarh-Palsit Highway and Durgapur Expressways.

Forming a part of West Bengal's National Highway 2 and at a combined length of almost 130km, these expressways were completed on a Build-Operate-Transfer basis, and our expertise included design, supervision and construction of service roads, bridges, interchanges, overpasses and toll booths.

Gamuda operates and maintains both expressways with the National Highways Authority of India.

Project value - RM649 million (AUD207.8 million)

Design, Build, Finance and Maintenance

128km road upgrade, 25 underpasses and four overpasses

50

# YEN SO SEWAGE TREATMENT PLANT AND YEN SO PARK, VIETNAM

The Yen So Sewage Treatment Plant and Yen So Park are Gamuda Land's expansion at its maiden township development of Gamuda City in Hanoi. The absence of a proper sewage system had resulted in contamination of its waterways and lakes, which created growing concern for public health and the need for better water management practices.

Backed by our credible experience and expertise in drainage and wastewater treatment projects, a proposal was made to the Hanoi government to build Yen So Sewage Treatment Plant and to rejuvenate Yen So Park.

Working alongside the Hanoi People's Committee on design, construction, testing and commissioning works, we constructed a plant that could treat up to 200,000m<sup>3</sup> of wastewater every day.

Meanwhile, environmental rehabilitation of the Yen So Park and Yen So Lakes remained a remarkable turnaround story depicting the transformation of one of Hanoi's most polluted and inhospitable areas into a thriving green lung. The project has improved the community's quality of life, as well as the water quality in surrounding rivers, lakes and drains.

Project value – RM735 million (AUD235.4 million)

Design, Build, Operate and Transfer

**Urban Renewal** 

# WATER DAM AND WATER TREATMENT PLANTS

#### **MALAYSIA**

# ULU PADAS HYDROELECTRIC PROJECT

Our proven track record in designing and constructing a dam and water treatment plants locally was pivotal in securing the Ulu Padas Hydroelectric Project in Tenom, Sabah.

The development holds significant importance for Sabah in providing a reliable renewable energy source. With a capacity of 187.5 megawatts, this hydroelectric project will substantially contribute to the state's power supply grid.

Aimed to be completed by 2029, the project will invigorate Sabah's western coastal corridor, sparking socio-economic growth along its pipelines.

Project value – RM4 billion (AUD1.28 billion)

Design, Construct, Test and Commission

# SUNGAI SELANGOR DAM

While Malaysia may be blessed with a relatively high amount of rainfall, storing rain for the dry days through dams is still necessary as rainfall is not evenly distributed throughout the year.

In 2000, Gamuda clinched the job to ensure water supply security for residents living in Selangor, Kuala Lumpur and Putrajaya through the construction of Sungai Selangor Dam, a regulating dam to store water from a pristine tropical forest catchment.

Collectively called Phase 3 of the Sungai Selangor Water Supply Scheme (SSP3), the project entailed the design and construction of a 110-m rock-filled regulating dam with storage capacity of 235 million cubic metres, river intake works, pipelines and two water treatment plants - one in Rasa and other in Bukit Badong. Gamuda's total water concessions provide 2,000 million litres per day of potable water.

Project value – RM2.15 billion (AUD690 million)
Design, Build, Operate and Transfer

# SUNGAI RASAU WATER SUPPLY SCHEME -(STAGE 1)

Our proven track record in designing and constructing a dam and water treatment plants locally was instrumental to our appointment as the Main Contractor for the Sungai Rasau Water Supply Scheme (Stage 1) by Pengurusan Air Selangor Sdn. Bhd. Our work scope includes designing and building the Rasau intake, raw water pumping mains, water treatment and associated works.

This project is crucial as Sungai Selangor Scheme is currently the only source of raw water supply to the Klang Region. With the implementation of the Rasau Scheme, the water reserve margin is expected to increase to 20.9 percent, with an estimated clean water supply of up to 700 million litres daily. This 35.5-month project is aimed to be completed by end 2025.

Project value - RM1.97 billion (AUD630 million)

Design and Construct

# RASA AND BUKIT BADONG WATER TREATMENT PLANTS

Providing clean and safe water for Malaysia's biggest cities, SSP3 consists at two water treatment plants - one in Rasa with a 250 million litres per day (mld) capacity and the other in Bukit Badong with an 800 mld capacity. These water treatment plants feature clarifiers, water quality monitors, disinfection and pH correction technology; engineered to be reliable, efficient and ready to serve the needs of surrounding residents.

Project value – RM2.2 billion (AUD700 million)

Design and Build

#### PRAI POWER STATION

Working with the National Electricity Board of Malaysia on the administration building, turbine blocks, power house and boiler plinths of this single-shaft power plant – making the Prai Power Plant the first of its kind in Southeast Asia at the time.

# MAKING GOOD AND SUSTAINABLE TOWNS

Gamuda Land, the property development division, is widely recognised as one of the nation's leading property developers. Through the culmination of over twenty years of building sustainable townships, Gamuda Land thrives on its development principles of a responsible town-maker through mindful masterplanning and quality execution.

Our vision in developing vibrant, smart and sustainable townships for the community has led to our success in Malaysia and expansion into the international market such as Australia, Vietnam, Singapore, and the United Kingdom.

- Total landbank of 2,217 acres
- 15 townships, 16 vertical communities and one commercial office across Australia, Vietnam, Singapore, the United Kingdom, and Malaysia
- More than 60,000 homes built
- More than RM100 billion in Gross Development Value

Updated as at July 2024

A mixed-use development in District 2 of Ho Chi Minh City near the city centre

Located next to Saigon High-tech Park and main thoroughfare Belt Road 3 and Long Thanh

# SILICON ISLAND, PENANG

Silicon Island, a 2,300-acre joint venture development with the Penang State Government over the next 15 years, will be a catalyst to realise the State's vision to build an environmentally sustainable high tech industrial hub and world class tourist destination.

# Taking the Pearl of the Orient into the Future

Silicon Island is a strategic, transformative development that will redefine the landscape of Penang, rejuvenating the southern coast of Penang Island.

A landmark project of the Gamuda Green Plan 2025, it aims at being climate-resilient with a target of 45 percent carbon emission reduction, earning its status as a Low Carbon City.

This will be achieved through promoting adoption of public transportation with 70:30 public-private transport mode share, over 400 acres green public spaces, 34 percent lower freshwater demand, 63.5 percent reduction in landfill waste and a 100 percent RE-powered industrial zone known as the Green Tech Park.

The Green Tech Park is dedicated to attracting high-value electrical and electronics (E&E) companies that will complement the industrial ecosystem of Bayan Lepas in Penang.

Accredited a 5-Diamond rating in the design category under the Low Carbon City Challenge by Malaysian Green Technology & Climate Change Corporation (MGTC), Silicon Island features super low energy buildings, and green mobility (bicycles and electric public transport over private cars), offering a world class smart and sustainable city that is a great place to live, work and thrive.

# ESG-compliant and in line with Penang2030 vision

Silicon Island is designed to meet global standards and local requirements, aligning itself to the State's Penang2030 vision that is centred around community and sustainability.

- UN Sustainable Development Goals
- Environmental, Social and Governance (ESG) principles
- Intergovernmental Panel for Climate Change (IPCC) to address sea level rising
- Low Carbon Cities Framework by MGTC
- National Physical Planning Council
- Department of Environment Advice on Environment Impact Assessment

#### Silicon Island will have:

- A 100 percent renewable energy powered Green Tech Park
- 6km Central Canal, 3km of public beaches and 5km of esplanade
- 110km of bicycle and walking tracks islandwide and 6km of a navigational waterway to encourage the use of green mobility, including water transportation
- Penang Mutiara Line will connect Komtar to Penang South Reclamation Island A with a connecting depot
- 17.5 percent of land on Silicon Island reserved for green parks, mangroves, water canals, wetlands, floodplains and bioswales to enhance biodiversity
- Minimum platform level of 3m above mean sea level to accommodate to IPCC's sea level rising prediction and face any joint occurrences of high tides with additional 1,000-year storm surge

# QUALITY, SAFETY, HEALTH AND ENVIRONMENT

Health and safety are a top priority in our operations to safeguard all our employees, contractors, customers, suppliers, local communities, and other stakeholders.

Steered by a robust Integrated Management System (IMS), which includes our OSH Management System, we strive to achieve zero fatality through continuous management, monitoring and improvement of the Group's health and safety performance.

We are certified with ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 with at least 14-year streak of 0 NCR in Gamuda Australia has also rolled out the Enabling Work SIRIM Recertification Audit 2023.

Our robust business continuity and crisis management plan ensures long-term operational resilience and workforce protection through our COVID-19 preparedness, Gamuda Clinic, and Centralised Labour Our consistent excellence beyond international safety Quarters (CLQ).

Gamuda also benchmarks its OSH performance against best practices in our countries of operation across the region.

Our rigorous engineering and safety measures for the completion of the Guantang Marine Bridge in Taoyuan, Taiwan earned us the Excellent Honour in Construction Golden Safety Award from Taiwan's Ministry of Labour.

Adopting the Australian Workplace Health and Safety (WHS) Standard, Gamuda became the first Malaysianbased company to achieve accreditation from the Office of the Federal Safety Commissioner as a Technically Assured Organisation by Transport for NSW.

programme, placing people at the centre of how we work and giving everyone a voice in how we tackle challenges. Meanwhile, Gamuda Singapore is accredited bizSAFE Star and is certified as a Green and Gracious Builder.

standards has resulted in an impressive track record of achieving industry-leading safety performance for underground tunnelling works. Since 2018, we have been recognised for maintaining a Five-Star rating by the prestigious British Safety Council.

- Excellent Honour in Public Construction Quality Award for Guantang Marine Bridge - 2024 Taiwan's Ministry of Economic Affairs
- Excellent Occupational Safety and Health in Public Infrastructure in Construction Golden Safety Award for 161kV Songshu to Guangfeng Underground Transmission Line -

Taiwan's Ministry of Labour

- Work, Health and Safety (WHS) Team of the Year Award - 2024 Australian Institute of Health and
- · Safety and Health Award Recognition for Projects (SHARP) for Defu Station and Tunnels, MRT Cross Island Line (Phase 1) - 2024 WSH Council

- National Occupational Safety and Health Award, Construction Category - 2022 National Council for Occupational Safety and Health
- **Excellent Honour In Construction** Golden Safety Award for Guantang Marine Bridge – 2022 Taiwan's Ministry of Labour
- · Sword of Honour Award for Mrt Putrajaya Line - 2022, 2020 and 2019 British Safety Council
- Five Star Occupational Health and Safety Audit (Five Stars) for MRT Putraiava Line (Underground) -2021, 2020, 2019 And 2018 British Safety Council

# **KVMRT SAFETY TRAINING CENTRE**

Our KVMRT Safety Training Centre is a testament to the In line with its establishment objective, the KVMRT Group's commitment to place safety first and elevate the standards of the whole MRT Putrajaya Line project. It was set up as part of the plan to reduce risks and practices that are deemed hazardous to address rising public concerns and scrutiny over the construction industry.

project, especially the Putrajaya Line, was made an example by the government to set the benchmark for best practices for the construction industry in Malaysia. With increased training and tighter safety strategy, the number of fatalities and injury-related accidents declined during MRT Putrajaya Line's construction compared with MRT Kaiang Line.

The purpose-built construction competency and safety training centre covers OSH training and skills involved in specific high-risk jobs and electrified rail infrastructure construction. Contractors for KVMRT projects must send their workers for safety induction courses.

As a leading construction company, having a safe work environment has contributed to safeguarding project reputation. Our emphasis on safety and health also boosted the morale of our employees, helped us retain our pool of skilled manpower, and contributed towards developing a safe work culture.

- More than 50,000 workers and employees completed the SHE Passport Scheme
- Constant innovation and upskilling are factors in Gamuda winning the construction industry's Builder of the Year, 2016 award

# GAMUDA PLANT OPERATOR SCHOOL (GPOS)

Gamuda Plant Operator School (GPOS) was established These programmes enable plant operators to obtain. Since its establishment, GPOS has produced more in 1997 to streamline different competency levels of Certificates of Competency that are recognised by than 45,000 trainees in crane and earthmoving plant earthmoving plant operations in Malaysia. It remains Government regulatory bodies such as the Department operation, and safety and health programmes. As many the only private training academy for crane operators of Occupational Safety and Health (DOSH) and as 75 percent of Malaysia's certified crane operators in the country. The school develops plant operators' Construction Industry Development Board (CIDB). This are GPOS trained. GPOS consists of in-house DOSH capabilities in three specific areas: skills competency, is significant as the Malaysian Government only permits approved trainers. safety awareness and youth apprenticeship programmes. Malaysians registered with DOSH to be trained as crane

- More than 45,000 trainees to date including subcontractors
- Malaysia's only private training academy for crane

# **TUNNELLING TRAINING ACADEMY (TTA)**

Launched in 2011, with an investment of RM10 million. Gamuda's Tunnelling Training Academy (TTA) is the first academy that develops niche talent for the highly specialised field of tunnel construction. It is the world's first learning institution specialising in TBM technology. The TTA was set up to address the shortage of a competent, local workforce for the tunnelling works. The academy has trained over a thousand tunnel engineers and skilled superintendents.

The establishment of this academy is in line with the Government's aspirations to transform Malaysia into a high-income nation as well as being part of MMC Gamuda's training initiatives to upgrade knowledge, skills, and performance of workers in the local construction industry for future projects.

We have planned to further enhance our TTA courses by collaborating with industry experts Herrenknecht, Bosch Rexroth and Schneider Electric Malaysia to meet local and international tunnelling construction requirements.

- Trained over 1,500 tunnellers for MRT Kajang and Putrajaya Lines
- World's first learning institution specialised in TBM technology
- 30 percent of our trainees are from Sabah and Sarawak

# TUNNELLING AND INFRASTRUCTURE ACADEMY (TIA)

Australia's Tunnelling and Infrastructure Academy (TIA) was established in 2023. It is located at Rosehill, New South Wales, positioned right next to Sydney Metro's Western Tunnelling Project.

This Academy focuses on training and upskilling our employees and delivery partners using virtual reality equipment, allowing trainees to learn in a safe and controlled environment before applying those skills on the worksite.

Our impact goes beyond our employees, benefiting various communities at large, from Aboriginal and Torres Strait Islanders to women in non-traditional roles, youths, migrants and diverse groups.

As part of the TIA's initiatives, we partnered with Australian social enterprise, Empowered Women in Trades to launch a paid training programme, designed to upskill women who may not have worked within the construction sector previously yet are seeking a career change and are willing to apply transferrable skills to a completely new role.

Participants receive two weeks of paid training, with an option to enrol in the 12-18-month programme Certificate III Civil Construction Apprenticeship at Clyde's Training Facility.

- An expansion of Gamuda's Tunnelling Training Academy in Malaysia
- 6,714 training enrolments and 512 individual training events. Three pre-employment programmes (with 42 percent female and 39 percent Aboriginal participation). 100 percent employment outcomes in the Sydney Metro First Nations and Women in Tunnel Pre-Employment Programmes
- Awarded the Sustainability Leadership (Excellence in Social) by Infrastructure Sustainability Council Awards 2024

# TECHNICAL AND VOCATIONAL EDUCATION AND TRAINING (TVET)

In 2023, with a RM30 million investment, the Group collaborated with private vocational training institution, VTAR Institute, to launch a new technical and vocational education and training (TVET) course for Next-Gen Digital IBS – the first for Malaysia.

The establishment of this programme is in line with the 12th Malaysian National Plan and the Government's vision to develop Malaysia into a fully industrialised country.

The programme aims to provide trainees with cutting-edge construction industry skills and helps bolster the competitiveness of local industries on the global stage.

Through TVET, Gamuda is dedicated to nurturing and upskilling local talent and strengthening the delivery of existing upskilling programmes to ensure a sustainable stream of future skilled workers.

- To train about 600 individuals over the next five years
- Collaborated with Merdeka University Berhad by providing full scholarships to two students to study TVET courses in Sichuan, China

# MALAYSIA'S FIRST AI ACADEMY IN THE CONSTRUCTION INDUSTRY

In 2024 we launched the Gamuda Al Academy, offering world-class training, industry-leading technology, and unparalleled mentorship to help participants master full stack Al. Recognising the urgent need for upskilling and reskilling the workforce, the Academy harnesses the power of Google Cloud's platform to quickly build and deploy solutions that infinitely scale, enriched with Gamuda's cutting-edge use cases, such as the award-winning autonomous tunnel boring machine, Building Information Management Augmented Reality (BIMAR), and other innovations.

The Gamuda Al Academy is a culmination of the Group's proven track record in upskilling talent and supply chain. Through our foundation arm, Yayasan Gamuda, the fully sponsored course aims to forge a new generation of skilled professionals and Al innovators with the latest GenAl tools on Google Cloud. With the first cohort intake in September, Gamuda takes another step towards bridging the Al talent gap in line with the national digital transformation roadmap.

The three-month immersive, project-based learning will equip participants with the relevant skills that are highly valued in the tech industry. At the same time, they will earn badges and certifications from Google Cloud that will be a game-changer for their professional profiles. Participants can also benefit from an optional internship leg with Gamuda or its partners to unlock career-defining opportunities, shaping a brighter future for individuals and industries.

# **BIM ACADEMY**

Gamuda's focus on embracing digital construction is further enhanced with the BIM Academy.

With Building Information Modelling (BIM) being an award-winning tool, the BIM Academy trains employees and subcontractors to design and automate our projects using the software.

It sets to pioneer a significant move up the value chain in the local construction sector to develop more skilled talent in the digital engineering ecosystem.

The Academy has trained over 1,000 employees and subcontractors to be able to design and operate this automated process using BIM software for MRT Putrajaya Line.

# DIVERSITY, EQUITY AND INCLUSION

Gamuda understands its role as we work towards gender equity across our operations. Across all levels, women make up at least 30 percent of the workforce by strong emphasis on developing a diverse workforce with employee category.

the executive level, making up 46 percent of all executives for people with disabilities, including neurodivergent working at Gamuda.

We offer employees equal pay for equal work, regardless of gender, and we continue to encourage and empower women to take leadership roles in various areas of our

Gamuda prioritises the hiring of local workers for our projects in all of our countries of operation and places a multilingual employees from varying ethnic backgrounds.

Notably, we have a high number of women employees at We also promote an equitable and inclusive workplace employees from our Enabling Academy.

# SOCIAL AND COMMUNITY PARTNERSHIP

Yayasan Gamuda was established in 2016 to oversee the Group's charity efforts while ensuring that they align with Gamuda's objectives for people development and community investment.

The Group allocates about two percent of its profits annually to Yayasan Gamuda.

Yayasan Gamuda conducts three anchor programmes:

- Enabling Academy
- Gamuda Scholarship
- Gamuda Inspiration Award

# SOCIAL AND COMMUNITY PARTNERSHIP

In 2017, Gamuda established the Enabling Academy (EA) to empower neurodivergent adults to be gainfully employed. Gamuda remains the first corporate company to operate an Employment Transition Programme (ETP) in Malavsia.

The ETP Trainer's Manual produced by the academy has been recognised by the Malaysian Ministries of Education, Youth and Sports as a leading guide for teachers and practitioners. The manual is available in English, Chinese and Bahasa Malaysia.

Going further, the EA has made its training resources and materials available in the public domain without charges. The sharing of the intellectual property is intended to help develop more trainers and teachers in this niche field in Malaysia.

We advocate for collaboration with partner companies that embrace neurodiversity to build an impactful ecosystem with support networks to encourage sustainable employment opportunities for people with

- More than 200 companies over 10 types of industries including banking, programming, accounting, oil and gas, legal, hospitality, retail, pharmaceutical, manufacturing, property and construction and more
- 81 percent graduates secured and sustained jobs at partner companies for at least a year
- First corporate company in Malaysia to establish and operate an ETP
- First in Malaysia to publish an ETP Trainer's Manual
- 118 graduates over 13 batches as of June 2024

#### **GAMUDA SCHOLARSHIP**

The Gamuda Scholarship, established in 1996, reflects our social (ESG) effort and commitment to preparing youth as future leaders. It provides educational support for young Malaysians to pursue university education and successful careers, contributing to community development.

Our 5-year plan includes upgrading the scholarship program, with a record RM30 million offered in 2024. We

are focusing on students from low-income families and increasing allocations for overseas studies in countries where we operate, such as Vietnam, Taiwan, and Australia. This effort includes an enhanced selection process and broader outreach.

- Total investment of RM30 million in 2024 to 123 students
- More than 70 percent of FY2024 scholars come from B40 families
- 21 scholars from Malaysia's Indigenous community - five Orang Asli from West Malaysia, 12 Orang Asal from Sabah, and four from Sarawak
- Our scholars are placed in local and overseas universities, including Ivy League placements

#### MALAYSIA

Supported more than 763 students, with a total scholarship sum exceeding RM114

AUSTRALIA
17 Indigenous yo 17 Indigenous youth to receive university and trade scholarships committed through the NRL School to Work Programme in 2024 by Gamuda Australia.

#### VIETNAM

15 scholarships offered by Gamuda Land Vietnam in 2023 and 2024.

100 University of Social Sciences and Humanities students received one-off financial assistance by Gamuda Land Vietnam.

# SOCIAL AND COMMUNITY PARTNERSHIP

#### **EMPOWERING SOCIAL WORK**

The Star Golden Hearts Award (SGHA) and Gamuda Inspiration Award (GIA) have been longstanding joint initiatives between The Star Foundation and Yayasan Gamuda, with a history of partnership since 2016. These awards hold significant recognition for humanitarian and social contributions in Malaysia.

Starting from 2024, Yayasan Gamuda has taken the lead in administering the GIA independently, marking a new chapter in our commitment to social impact and community development.

This award recognises individuals or groups for their outstanding service and contribution to society. In particular, community work related to employment, entrepreneurship, youth empowerment, digital literacy, waste management, nature conservation, urban agriculture, ecotourism, community welfare, disabled with special needs, water and sanitation in rural and indigenous communities, and animal welfare.

#### **POSITIVE SOCIAL IMPACT IN AUSTRALIA**

Gamuda Australia's partnership with the NRL School to As a part of their scholarship recipients will also be able Work Program reflects an investment to enable more to complete a paid internship with Gamuda Australia Indigenous youth to transition into further education, to enhance their field experience while they study. training, and meaningful employment.

In 2024, 17 university and trade scholarships are talent and fostering inclusivity within the construction committed towards alleviating initial financial barriers sector. associated with educational and vocational pursuits, covering expenses such as tuition fees, tools, personal protective equipment, uniforms, and transportation.

This underscores our commitment to nurturing young

#### GAMUDA AUSTRALIA GRADUATE PROGRAMME

Gamuda Australia's graduates of 2023 participated in The team also donated and planted 400 native a unique social impact project, where they designed, built, and installed habitats for local wildlife to help regenerate local flora and fauna in the Agnes Banks Gamuda Australia's Graduate Programme enables bushlands in Western Sydney.

They teamed up with the Deerubbin Local Aboriginal Land Council (LALC) to create:

- 10 bee hotels to attract native bees, which will pollinate the threatened native fauna species throughout the area
- 10 bird boxes for kookaburras to use as nests to rejuvenate the native bird population
- 10 special PVC cockatoo bird boxes to attract them back to the area to rejuvenate the native flora and fauna.

seedlings to regenerate bushland.

students to develop the skills needed to launch their career, while the social impact project has helped them discover their purpose in work by channelling their engineering capabilities towards creating a positive impact on the environment.

The project also plays an important role in Gamuda's reconciliation journey, which aligns with our Reconciliation Action Plan and Seeds for Growth sustainability framework.

# SOCIAL AND COMMUNITY PARTNERSHIP

# PARTNERSHIP WITH MAJOR PROJECTS GROUP

In 2024, Gamuda partnered with Major Projects Group (a demolition company and certified social enterprise), dedicating 50 percent of all profits to charity via their Major Projects Foundation.

The Foundation focuses on safeguarding and revitalising Australian coastal and Pacific Islands waters. This includes undertaking critical research into the M/V Limerick wreck, which lies off the coast of Ballina, New South Wales. The vessel poses an environmental hazard, frequently leaking fuel into the surrounding ecosystem, with recorded slicks extending up to 10km.

The partnership is part of Gamuda's Collaborating for Change initiative – one of the pillars of our "Seeds for Growth" sustainability framework.

# INDIGENOUS PARTNERSHIPS

Gamuda is committed to respecting the rights of Indigenous groups according to the United Nations Declaration on the Rights of Indigenous Peoples, and always seek their free, prior, and informed consent (FPIC) in any decisions that may affect them

Our programmes on uplifting Indigenous peoples in Malaysia and Australia are focused on benefit sharing and cultural preservation, which has enabled us to develop lasting relationships built on mutual respect and trust.

#### **ORANG ASLI IN MALAYSIA**

We provide access to employment and income opportunities to the Orang Asli in Malaysia. Our Orang Asli employees make up 5.3 percent of our workforce.

In other ways of supporting them with sustainable income opportunities, we provide knowledge transfer sessions and cultural showcases, where they sell traditional handicraft, and conduct cooking demos, weaving workshops, and cultural performances at the Wetlands Arboretum Centre in Gamuda Cove.

Recognising their deep connection with nature, we work alongside them to manage natural resources sustainably.

Besides Gamuda Scholarship, Yayasan Gamuda offers its Strengths-Based Education programme for students and out-of-school children and youth at Community Learning Centres.

In addition, we have published a storybook, titled, 'Stories from the Orang Asli Communities' by Orang Asli writers to conserve the oral wisdom of the community.

#### ABORIGINAL AND TORRES STRAIT ISLANDERS IN AUSTRALIA

Our Reflect Reconciliation Action Plan (RAP) seeks to deepen engagement with Indigenous communities as we grow our business in Australia.

We have improved employment outcomes by increasing Aboriginal and Torres Strait Islander recruitment, retention and professional development. They currently make up 2.5 percent of our Australian workforce.

We have increased supplier diversity to improve economic and social outcomes, investing over AUD47 million in 76 Aboriginal businesses. Gamuda is a member of Supply Nation, NSW Indigenous Chamber of Commerce, Kinaway Indigenous Chamber of Commerce, and Yarpa Hub.

Meanwhile, in our project delivery, our stakeholder advocacy and outreach programmes include Aboriginal and Torres Strait Islander groups.

Our social programmes include cultural events and education – for example, we observe cultural protocols, awareness and sensitivity training, as well as celebrat National Reconciliation Week and NAIDOC Week.
