

An aerial photograph of a lush golf course. A large, calm lake in the center reflects the sky and surrounding greenery. The golf course features well-manicured fairways, several sand traps, and a dense forest of tall trees. In the background, rolling mountains are visible under a bright, hazy sky with soft clouds. The overall scene is peaceful and scenic.

GAMUDA LAND

GAMUDA LAND

When we get the places right, the town works

When we develop a personality for the town,
with great community places and lovely placemaking,
we are also mindful to work with nature and not against it,
and to always listen to what the land has to tell us.

When we lay out the parks and lakes,
to open up to each neighbourhood,
we will have native plants that attract rich biodiversity.
We preserve nature that was there long before us.
And we put bicycles ahead of cars.

When people begin to move in,
they'll experience a real difference.
This is how we make towns that work,
for the people who call it home.

GAMUDA LAND

OVERVIEW

Homes

More than 60,000 homes built

Landbank

Total landbank: 2,217 acres

GDV

More than RM 100 billion in
Gross Development Value

Developments

15 townships, 18 vertical communities,
1 commercial office across Malaysia, Vietnam,
Singapore, Australia & United Kingdom

Figures are updated as at 31 July 2024

GAMUDA LAND

In 2021, Gamuda Group unveiled the Gamuda Green Plan, a commitment to sustainable construction and development with specific steps to reduce direct and indirect greenhouse gas (GHG) emissions' intensity by 30% in 2025 and by 45% in 2030. The Group aims to achieve this by the way of the four (4) pillars.

Pillar 2

Our community in our business
To develop talents capable of cultivating good opportunities and growth in Environmental, Social, and Governance (ESG).

GAMUDA LAND

GAMUDA GREEN PLAN

A town is community

The common ground for everyone is the community.
Where people know one another.
Where they live together.
Where they look out for each other.

As a town maker, we are creating a place for everyone to call home;
growing families, retirees to young married couples and singles.

Our architectural design and planning always promote connectivity,
so you can truly get to know your neighbours.

This includes our neighbouring indigenous community.
We care for their welfare.

The walkability and bikeability of our streets
are just as important.

From your front door to the town square – we always want you to
experience a fascinating journey.

Sustaining children's education programme.

Helping indigenous women set up Restoran Italic, dubbed the Orang Asli Café that serves indigenous delicacies made with fresh ingredients from their own gardens.

Pillar 3

Environmental & biodiversity conservation
To drive impactful efforts in nature conservation and biodiversity stewardship in our townships and property developments.

GAMUDA LAND

GAMUDA GREEN PLAN

Working with nature out of respect for what was there before us

Our land has blessed us with many resources
rolling terrain, hills, wetlands.

So, we are able to work with nature,
preserving what was there before us
and finding innovative ways
to incorporate them into our masterplan.

We bring the water that runs off the land
to flow into natural ravines between hills to create lakes.

We preserve the hills in our towns
so we are able to have hilltop homes
just as we have lakeside homes.

Trees that were there long before we came,
we preserve and transplant only when required.

As such, the essence of the place remains unchanged, only enhanced.

GAMUDA PARKS

A BETTER ENVIRONMENT FOR OUR FUTURE

Gamuda Parks is spearheaded by Gamuda Land to drive consistency in our approach to biodiversity conservation. This is parallel with our brand value of “Respecting nature and environment” and brand story “Listening to what the land has to tell us”.

We put together a group of experts, botanists and horticulturists to implement continuous improvement ideas for the maintenance of the greens within our townships and high rise developments. Our commitment is to create a more livable environment for our community. We hope to form a more enjoyable, closely knitted and a better integrated community. We believe our community deserves to live in a well planned, clean, safe and accessible environment while staying connected to nature.

This initiative aims to formalize how the park environments within Gamuda Land developments are managed and communicated to residents and the general public.

Advanced Tree Planting

Mobilised a total area of 43 acres within our developments to maintain young trees and saplings for transplantation.

GAMUDA LAND

GAMUDA GREEN PLAN

Biodiversity Audit

To establish a baseline for biodiversity and benchmark the subsequent growth to foster a vibrant ecosystem within our developments.

GAMUDA GREEN PLAN

Rehabilitation of Yen So Park, Gamuda City

Transforming one of Hanoi's most polluted and inhospitable areas into a thriving green lung featuring picturesque parkland of scenic lakes, lush greenery and abundant flora and fauna through the development of an effective Sewage Treatment Plant for Hanoi and the rejuvenation of the 102-acre Yen So Park.

GAMUDA LAND

GAMUDA GREEN PLAN

Transforming a monoculture land into a biodiverse parkland, Gamuda Gardens

From its humble beginnings as an abandoned rubber plantation and waste dumping ground, this 810-acre township has been mindfully transformed into a vast biodiverse ecosystem through the creation of a 50-acre park. Together with the lush greenery and undulating lawns, the green lung is now a social and recreational hub for the community.

GAMUDA LAND

GAMUDA GREEN PLAN

Wetlands Arboretum, Gamuda Cove

Developed in partnership with Forest Research Institute Malaysia (FRIM) and University Malaya, it is home to over 300 carefully curated native species of flora and fauna that are endangered.

GAMUDA LAND
GAMUDA GREEN PLAN

Pillar 4

Enhancing sustainability via digitilisation
90% of Gamuda Land's landed terrace homes are built using the Next-Gen Digital IBS, with 40% time savings and 55% reduction of manual (foreign) workers.

GAMUDA LAND

GAMUDA GREEN PLAN

A town must stand the test of time

When we make a town,
we think not only of what was there before us.
We think also of what is yet to come.
It is trying to do things better today
for a better tomorrow.

It's about using digitalisation
to deliver smart home systems,
and drive sustainable construction
using digital IBS in a robotic factory.
It means better precision and better quality homes.
It also means we'll have less worry of repairs
and maintenance in the future.

This is how we look at the details.
And how we plan for tomorrow.
To make the town work
for the people who call it home.

GAMUDA LAND

GAMUDA GREEN PLAN

Next-Gen Digital Industrialised Building System (IBS)

Gamuda's Next-Gen Digital Industrialised Building System (IBS) is an end-to-end digital IBS solutions provider, pioneering digital IBS adoption in Malaysia with the country's first digital IBS facility. Automation, robotic construction and digital IBS on a cloud-based BIM platform is re-shaping the industry with greater creative agility, precision, speed and consistently high quality of finish.

Gamuda's Next-Gen Digital IBS is able to easily build a wide range of products, be it affordable homes, Luxurious landed homes, high rise buildings and even public facilities like schools and hospitals. Every component is produced at our controlled factory environment and fully tested, meaning quality is assured through this safer and more sustainable construction method with minimal wastage.

GAMUDA LAND
GAMUDA GREEN PLAN

40% shorter construction timeframes

Next-Gen Digital IBS runs efficiently on a BIM platform which dictates the robotic operations. It reduces construction time frames by up to 40%. Construction output can be as high as 10,000 houses per year, equivalent to 40 houses a day, with a sustainable digital ecosystem.

GAMUDA LAND

GAMUDA GREEN PLAN

Modular building designs and better quality homes

Gamuda's Next-Gen Digital IBS creates better precision and improves quality of homes.

GAMUDA LAND

GAMUDA GREEN PLAN

Flexible design

Next-Gen Digital IBS allows flexibility in design be it landed or high-rise.

A scenic landscape featuring a calm lake in the foreground, reflecting the surrounding greenery and the bright sky. The middle ground is filled with lush green trees and grassy banks. In the background, misty mountains are visible under a sky with soft, wispy clouds. The sun is low on the horizon, creating a warm, golden glow and lens flare effects across the scene.

OUR DEVELOPMENTS

An aerial photograph of a large, master-planned island development. The island is densely packed with modern residential and commercial buildings, interspersed with lush green trees and landscaped parks. A central water body, possibly a lake or a large pond, is visible within the development. The island is surrounded by clear, turquoise water, and a few small boats are visible in the surrounding sea. In the background, a larger landmass with more developed infrastructure and a beach is visible.
